Shaadi App – Web-Based Wedding Event Management System:

- Designed and developed a multi-page event management web application using CRUD operations to manage end-to- end wedding logistics, improving administrative efficiency by 70%.
- Engineered modular pages including Dashboard, Pickup/Drop Management, Guest List, Hotel & Ceremony Management, Admin Panels (Super/Sub-admin), and Best Wishes page using dynamic sidebar navigation.
- Implemented CSV upload functionality to bulk-import guest data into the database, reducing manual data entry time by 90%; enabled PDF download of guest list for offline use.
- Built a searchable and filterable table system across all pages to retrieve specific records instantly, enhancing user data access and navigation.
- Developed Gallery and About sections to showcase event photos and bride/groom information with media support.
- Integrated System page to display personalized client wedding details, enabling reuse of the app for multiple weddings with dynamic content loading.
